### **8 Reasons to Choose Organic:**

1. Include no poisonous chemicals that contaminate the air, water, soil and our bodies (like GMO's, poisonous pesticides, synthetic fertilizer, antibiotics and hormones).
2. Reduce, if not eliminate, farm-based pollution
3. Protect future generations: poisons passed from mother to child
4. Taste better with truer flavor (studies show)
5. Promote biodiversity / farm reforestation
6. Assist with cultural and environmental conservation
7. Build healthy soil with microbiotic vibrancy. Feed the soil, not the plant.
8. Safeguard animal welfare and protect wildlife
